

# Coppa Club

Aqua illi and Aqua Alto taps join the busy team at Coppa Club.

## Introduction

Coppa Club is a local hangout and home-from-home, offering something for everyone. For many years, only members' clubs have offered space for guests to stay all day. Coppa Club is changing that by creating an informal, relaxed, and welcoming atmosphere, allowing their customers to sit in comfortable furniture, enjoying plenty of Wi-Fi and plug sockets whilst they attend meetings – or just to settle in with a laptop. Menus focus on thoughtful, unfussy European food, and the bars serve great wines and cocktails.

The first Coppa Club opened in 2015, in the Berkshire countryside village of Sonning-on-Thames. Since then, seven more Coppa Club venues have opened across London and surrounding counties, including Henley-on-Thames, Maidenhead, Streatley-on-Thames, Brighton, Tower Bridge, Clifton Village, and Cobham Village.

It was an absolute pleasure for us, at Aqua Libra Co, to work with this progressive brand in their stunning Restaurant in Cobham Village. It was wonderful to see customers enjoying freshly dispensed chilled, sparkling, and boiled water from our taps, Aqua Alto and Aqua illi.

## Challenge

The procurement team at Coppa Club were looking for a sustainable hydration solution – one that provided fresh, great-tasting chilled and sparkling water via individual water dispensers in their very busy refreshment areas.

They set out the criteria: high-performance water dispensers to fill refillable bottles; reliable customer service; and top-quality aesthetics to match their premium interior design. As well as offering cold water drinks, they needed an integrated boiling and ambient water dispenser behind the bar for the preparation of drinks.

## Solution

Coppa Club has decided to install two Aqua Alto taps in Chrome to dispense high volumes of chilled water, both still and sparkling. These are positioned in the prime location near the bar for the convenience of their staff. The Aqua illi, in Matt Black, is dispensing boiling and ambient water to assist with hot drinks.

*“Every restaurant should offer fresh drinking water. Here at Coppa Club, we’re focused on sustainability, and we were looking for an equally passionate hydration partner. When we approached Aqua Libra Co, we were impressed with the innovation and aesthetics of their products, and we knew they would complement our interior design perfectly. Our Aqua Alto and illi taps are easy to use and maintain, and we’ve received great feedback from our customers. The Aqua Libra Co team has been very responsive and has fully met our expectations. Therefore, we’re rolling out the programme of installing Aqua Libra Co taps in all our Coppa Club restaurants across the UK.”*
